

# Bemidji Area Cross Country Ski Club Storage Building Project

For nearly 40 years, the BACCSC has been clearing and grooming 60 miles of local ski trails. Our work would not be possible without equipment which has grown to include heavy duty snowmobiles, several trailers, mowers, ATVs and specialized trail grooming devices. Additionally, we have skiing

equipment to outfit more than 100 people. Our equipment has been stored at the homes of club volunteers. But we need a more long-term storage solution.

## Building Design and Location

We are partnering with Beltrami County to locate the building on county land on Adams Avenue in Bemidji. The location is ideal. Above is a sketch of the building we hope to construct. The overall footprint will be about 40 ft. by 60 ft. One of the bays will be heated. We will have a loft for Ski School Storage over the work spaces. Garage doors on both ends will allow for easy access trailering equipment.

## Fundraising

We're off to a great start on the project, with the County showing their support and offering land at minimal cost. And the George W. Neilson Foundation has already granted us \$106,000. In addition we have raised nearly 85,000 from local skiers and enthusiasts. Our preliminary building cost is estimated \$213,000 This means we need to raise about another \$17,000 through fundraising and additional grants.
